Write up's :

18. Major Projects Undertaken in the past :

1)AI Resume Parser & Candidate Management System: Developed a full-stack web application that extracts information from resumes using NLP and Regex without relying on external APIs. The system automatically stores extracted candidate details in MongoDB and provides an efficient interface for recruiters to manage applications. 2)AI-Based Investment Advisor: Built a web platform that analyzes market data and provides investment recommendations using machine learning techniques.

19. Which is your area/ subject matter of Interest and why? :

My areas of interest are Cybersecurity, artificial intelligence, Blockchain, and Full Stack Development. Cybersecurity interests me because protecting sensitive data and preventing cyber threats are essential for organizations that manage critical public information. Blockchain fascinates me due to its ability to provide transparency, traceability, and tamper-proof record keeping

20. Why would you like to join FSSAI for Internship? :

I would love to be part of FSSAI as it provides me an opportunity to use my technical skills in projects, which have a positive impact on the society. Computer Science student, I am interested in cybersecurity, blockchain and full-stack development and I believe these technologies can strengthen digital governance, data security and transparency in food safety system. I hope to intern at FSSAI to gain experience of how technology is used in the public sector, working with experienced profession.

21. Month of Commencement of Internship :

July 2026
